

*FOLDERWAVE: THE LATEST TECHNOLOGY IN APPLICATION DEVELOPMENT AND
PROCESS MANAGEMENT*

FolderWave has developed technology and products to create a web enable application environment defined by the following attributes

- Mission critical
- Process driven
- Enterprise wide
- Multiple data sources
- Multiple data format
- "Real time"

The FolderWave architecture has evolved from extensive prior experience in workflow and imaging and has been enabled by the expansion and proliferation of the World Wide Web. All of the profound developments that have enabled and driven the worldwide web provide a perfect foundation for FolderWave's new application generator technology. Standard browsers enable the FolderWave solution with minimal installation. Along with leading edge integration capabilities, the FolderWave solutions can be plugged in to your existing systems architecture easier than ever before.

Higher Education is FolderWave's industry of choice for its initial introduction of this revolutionary capability. However, if you are in the secondary or post secondary education area, our solutions will provide you with increased efficiency too.

The FolderWave solution set will support several business models including:

Intranet- provide solutions for customer internal use,
Internet –provide solution set functionality over the Internet (ASP)
Outsourcing –provide ASP plus value added services

The flexibility we offer in the implementation of our solutions provides you with the opportunity to select what is best for you. If you like to manage the system yourself, then the intranet model would be best for you. If you like the idea of getting out of the systems business, we can manage the software and infrastructure for you. Either way, it is your choice.

If you are looking for a competitive edge through increased efficiency in document handling and process integration, FolderWave is the solution you need.

If you would like more information on our products and services, please visit our web site at www.folderwave.com or contact us at info@folderwave.com.

FolderWave has accomplished this by using a unique combination of the following capabilities:

- Document management
- Workflow
- Imaging
- Process integration
- Data Integration
- The Internet
